Business English Brochure

English at your fingertips

ILE's Business Lessons

If you want to improve your English to learn business terminology, vocabulary, range of grammar, and to communicate more professionally at work, or to grow your own business, then this is the course for you. You can have private or group lessons with other students who work in a similar industry. This is also a great way of networking.

ILE's Business lessons are ideal for busy executives, people in marketing, sales, human resource management, public relations (PR), event planning, retail, and business students who need to improve their professional communication quickly and efficiently. We also cater for other

professions that are outside the standard business spectrum such as tour guides, holiday reps, the airline industry, and many more. Our business lessons are specially designed for each industry and are adapted to the individual goals of each student. We balance theoretical and practical language learning perfectly to help you achieve that high-paying job, get a promotion, or simply become a better professional and respected leader.

Why Online?

The great thing about learning online is that during lessons you use everyday technological tools that you would use at work such as Skype, WhatsApp, Facebook, LinkedIn, email, Twitter, Instagram and so on. Furthermore, you get to choose your timetable and the specific language skills that you want to concentrate on (speaking, listening, reading, writing).

Testimonial

"I feel so much more confident in my job than I did before. I no longer feel shy when speaking or writing emails in English." *Alexander, Russia 2016-17*

What are the lessons like?

Lessons happen online using Skype and other similar speaking platforms. Lesson material is shared via email or on Skype. The teachers at ILE prepare lessons according to your requirements, and what your needs are. If you are in a group of 6, then the teacher

will make sure that all 6 students and their needs are reflected in the lessons.

Using Skype, emails, Facebook, WhatsApp, as well as other online platforms, you will develop your English skills covering a wide range of business situations. Here are some

examples of the areas you will focus on: business meetings, business proposals, telephone calls, formal emails, job Interviews, sales pitch, negotiations, reports, analysing market data, managing people & time management.
